Outline of True Science Workshop #1 – an introduction to science a hands-on science workshop

Following are the topics covered in True Science Workshop #1.

Physics

The effects of air pressure - flight, contraction and expansion

Working with the three laws of motion

Observing the effects of water density, layering water

Gravity, Electricity & Magnetism – making a compass and using an electromagnet

Chemistry

Creating compounds & determining the acids and bases of common substances

Geology and Paleontology

Rock and Fossil formation

The emphasis of the Workshop is on the unity and reliability of God's laws in Creation as the students do the various demonstrations. The Workshop is recommended for third grade and up and lasts approximately 3 hours. Two sessions can be held on the same day.

If the Lord is abandoned as Creator, He will soon be lost as Savior.
